

VASYLI LOWER LIMB BIOMECHANICS ONE DAY WORKSHOPS

BLUE LEAF MEDICAL

The 2009 Workshop Programme

Overview

If your practice is considering dispensing "off the shelf" orthotics, and are perhaps a little apprehensive as to how to "get started" then this is the perfect introductory workshop. Alternatively, if you are looking for a comprehensive refresher course on LLB as part of your continuing education portfolio, then the subject matter presented will be of interest to you

Facilitator

Sue Mars

Bsc Physio UCT ; M Med Sc (Sport) UKZN

Current SASMA member, current SASP KZN Sports

Group committee, Past SASP Chairperson, ex SASP Exco Member

Course Objectives:

CPD: 6 CREDITS

Participants will learn during the one day workshop

- Biomechanical terminology of the foot and lower limb.
- Tri-plane motion
- Phases of the Gait cycle
- Assessment techniques for both the rear foot and fore foot
- Diagnosis and treatments for common lower limb biomechanical pathologies
- Sagittal Plane mechanics
- The importance of 1st ray function
- Subtalar joint motion
- Orthotic Heat moulding and fitting
- Wedging techniques

PLEASE NOTE:

Bring a comfortable pair of shoes or trainers for the practical orthotic fitting session
